

COVID-19 Update April 12, 2020: Public Health Announces 146 More Positive Cases; 2 New Deaths

SMYRNA (April 12, 2020) – The Delaware Division of Public Health (DPH) is announcing two additional fatalities related to coronavirus disease 2019 (COVID-19) and is providing an update on the number of positive cases and recovered individuals.

DPH is now reporting deaths of laboratory-confirmed individuals and deaths involving “probable” cases where the individual had clinically consistent symptoms and was exposed to a confirmed case, but was never tested before their death. This new guidance comes from the Centers for the Disease Control and Prevention (CDC).

In total, 35 Delawareans have passed away due to complications from COVID-19. The most recent deaths involve a 33-year-old female resident of a long-term care facility in Sussex County who had underlying health conditions and an 88-year-old female resident of a long-term care facility in Sussex County who had underlying health conditions. Individuals who have died from COVID-19 ranged in age from 33 to 96 years old.

To protect personal health information, DPH will not confirm specific information about any individual case, even if other persons or entities disclose it independently.

The latest Delaware COVID-19 case statistics, cumulatively since March 11, include:

- 1,625 total laboratory-confirmed cases
- New Castle County cases: 880

- Kent County cases: 281
- Sussex County cases: 464
- Males: 725; Females: 900
- Age range: 1 to 97
- Currently hospitalized: 201; Critically ill: 51 (This data represents individuals currently hospitalized in a Delaware hospital regardless of residence, and is not cumulative.)
- Delawareans recovered: 213
- 10,195 negative cases*

**Data on negative cases are preliminary, based on negative results reported to DPH by state and commercial laboratories performing analysis.*

DPH epidemiologists are transitioning to a new data reporting system. During the transition period, not all fields (county of residence, sex) have complete information.

The Department of Health and Social Services' Division of Public Health and Division of Health Care Quality also released revisions today to the Friday, April 10, announcement of positive cases and deaths in Delaware care facilities, including long-term care facilities. The revisions are:

- HarborChase of Wilmington has one resident death; it was listed as having two.
- New Castle Health and Rehab in New Castle was listed as having three resident deaths; it does not have any deaths among residents.
- Shipley Manor in Wilmington was listed as having multiple positive cases; it does not have any positive resident cases.

No facilities have reported staff deaths related to COVID-19.

Delaware is considering patients fully recovered seven days after the resolution of their symptoms. Three days after symptoms resolve, patients are no longer required to self-

isolate at home; however, they must continue to practice strict social distancing for the remaining four days before returning to their normal daily routine.

Widespread community transmission is occurring throughout the state, which means COVID-19 is actively circulating in the community. If you are sick with any of the following symptoms, stay home: fever, cough, shortness of breath, sore throat, muscle fatigue, or digestive symptoms such as vomiting, diarrhea, abdominal pain or lack of appetite. If you are sick and need essential supplies, ask someone else to go to the grocery store or the pharmacy to get what you need.

If you think you have been exposed to someone with COVID-19, or have symptoms of illness, make sure to distance yourself from others, particularly vulnerable populations. Older adults and people of any age with serious underlying medical conditions – including serious heart conditions, chronic lung conditions, including moderate to severe asthma, severe obesity and those who are immunocompromised, including through cancer treatment – might be at higher risk for severe illness from COVID-19.

Statewide testing at standing health facility testing sites require a physician's order or prescription to be tested (*Bayhealth patients will be pre-screened via phone without needing to see a provider first). These are not walk-in testing sites. Those without a primary care provider can call the DPH Call Center Line at 1-866-408-1899. In New Castle County, individuals can call ChristianaCare at 1-302-733-1000 and Sussex County residents who do not have a provider can call the Beebe COVID-19 Screening Line at 302-645-3200. Individuals awaiting test results, should wait to hear back from their medical provider. The DPH Call Center does not have test results.

Anyone with a question about COVID-19, whether related to

medical or social service needs, should call Delaware 2-1-1; or 7-1-1 for individuals who are deaf or hard of hearing, or text your ZIP code to 898-211. Hours of operation are 8 a.m. to 9 p.m. Monday through Friday; 9 a.m. to 5 p.m. Saturday and Sunday.

In addition, the Division of Public Health asks any Delaware health care, long-term care, residential, or other high-risk facility with questions or concerns to email: DPH_PAC@delaware.gov or call the DPH Call Center at 1-866-408-1899 and press ext. 2.

Questions can also be submitted by email at DPHCall@delaware.gov.

DPH will continue to update the public as more information becomes available. For the latest on Delaware's response, go to de.gov/coronavirus.
